

In certain circumstances non-furniture catalogues will contain variations of the same product, but the nature of the non-furniture catalogue structure gives the appearance of duplicate products on the site with no obvious indication of any differences.

This is down to how the supplier supplies the catalogue data to EQ Software initially.

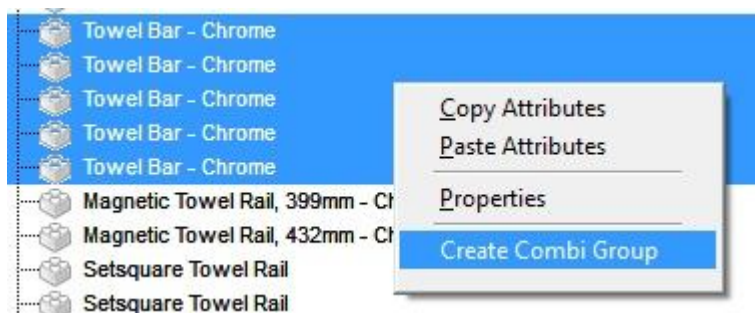

Combi Groups allows you to group these products together, and give an option on the site by way of a Drop Down List or Product Link making the differences clearer to the end user.

Below is an example of a Towel Rail that comes in 5 variants of Qty of Elements.

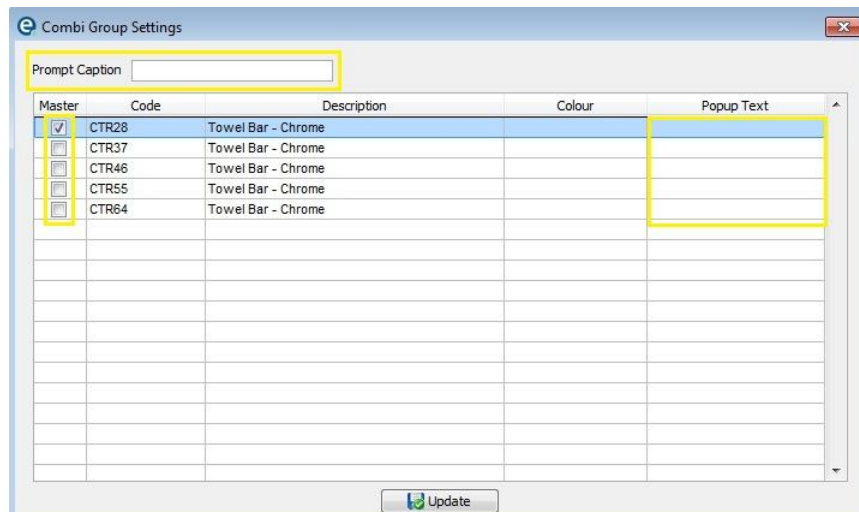

Towel Bar - Chrome	CTR28		✓
Towel Bar - Chrome	CTR37		✓
Towel Bar - Chrome	CTR46		✓
Towel Bar - Chrome	CTR55		✓
Towel Bar - Chrome	CTR64		✓

If this is exported to a website, each product would be displayed on their own product page without any indication that other variations are available.

To create the a Combi Group of these products, highlight them all by clicking on the first one in the list, pressing the CTRL key and clicking the last one in the list – then right-click the highlighted list > **Create Combi Group**

And you'll be presented with the following screen.

## eStore – Combi Groups... cont.

**Prompt Caption** | is the heading text of the option, and should be an indication of what the variation is. (e.g. Size or Colour)

**Master** | the combi group requires a Master product to lead the rest of the variations list; ticking the box next to the relevant product indicates the Master product.

**Popup Text** | this is the text that will appear in the drop-down list displayed on-line.

### Example:

Master	Code	Description	Colour	Popup Text
<input checked="" type="checkbox"/>	CTR28	Towel Bar - Chrome		6 Elements
<input type="checkbox"/>	CTR37	Towel Bar - Chrome		8 Elements
<input type="checkbox"/>	CTR46	Towel Bar - Chrome		10 Elements
<input type="checkbox"/>	CTR55	Towel Bar - Chrome		12 Elements
<input type="checkbox"/>	CTR64	Towel Bar - Chrome		14 Elements

Once these are set-up, select **Update** to save the settings, and they new group should appear similar to the following.

**Towel Bar - Chrome [6 Elements]**

Towel Bar - Chrome [8 Elements]

Towel Bar - Chrome [10 Elements]

Towel Bar - Chrome [12 Elements]

Towel Bar - Chrome [14 Elements]

**CTR28**

CTR37

CTR46

CTR55

CTR64

With the Master Product appearing in **Bold**, and the variations appearing greyed-out listed beneath, the pop-up text also appears next to each product.

The catalogue can now be exported as normal for the on-line changes to take effect.

The products will now appear online showing the additional options available on the individual product pages.

There are two methods of displaying the combi-groups online; a drop-down menu or a link-list- both are shown in this example.

**Towel Bar - Chrome**

Full Width rail across 6 elements
